

Health Promotion Program

PRIMARY CARE CONNECT

The Health Promotion Program aims to work in partnership with other organisations and communities to develop targeted programs that facilitate active learning and encourage individuals to take control of their own health and wellbeing.

Health Promotion activities can be varied and range from advocacy on behalf of communities, focusing on improving settings, such as schools and workplaces, to be more health promoting and the provision of health information and resources.

Two key health promotion priorities have been identified as Healthy Eating and Social Connection. PCC will be working in partnership with other member agencies in order to bring about improved health outcomes in these two particular areas.

To access the Health Promotion Program please contact Primary Care Connect on (03) 5823 3200 or visit our website at www.primarycareconnect.com.au
