

Men's Family Violence Intervention Services

Men's Family Violence Intervention Services provides support and assistance to men who want to change their controlling or violent behaviour and become better men, partners and fathers.

It is an opportunity for men to understand who they are, how their behaviour affects women and children in their lives.

This service will give men the tools that look at old ways of thinking and acting, and learning to be responsible for their actions all aimed to bring about positive change.

This service is to help men stop hurting the people they care about most.

To access the Men's Family Violence Intervention Services please contact Primary Care Connect on (03) 5823 3200 or visit our website at www.primarycareconnect.com.au.
